Advanced AI-powered resume analysis

Elevate Your Professional Profile with Precision Analysis

Our sophisticated AI engine examines every aspect of your resume, delivering actionable recommendations that align with industry standards and recruiter expectations.

- ✓ Comprehensive content evaluation and optimization
- ✓ Industry-specific keyword identification
- ✓ Format and structure enhancement

Description

AI Resume Analyzer is an AI-driven application that evaluates resumes to provide smart and data-backed feedback. The tool extracts key details like skills, education, work experience, and important keywords while predicting the ATS (Applicant Tracking System) score. It compares the resume with job requirements to highlight missing skills and areas of improvement.

Core features include:

- ATS score analysis and keyword evaluation
- Automatic skill and information extraction
- Skill gap identification and job-resume matching
- Tailored resume improvement recommendations

Thanks to Magic bus for acquiring me the wonderful skills about the booming skills in the current market .

Thanks to IBM (International Business Machines)
